

INTEGRATED SYSTEM PLATFORM

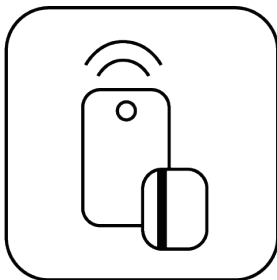

Advanced Software Made Simple

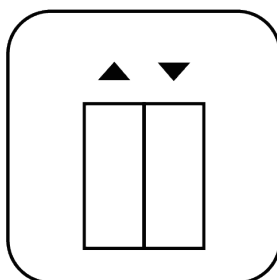

HIGHLIGHTS

- Windows 7 or higher, MS SQL 2008 R2 or higher
- Multi-language
- Client Server Application
- Multi-threading programming, high speed response
- Login user access rights controlled by application, department, and device
- High security scramble data encryption during data exchange ACX panels to PC software

Access Control System

- Maintenance for access controllers, readers and time zones setting
- Email notification for critical events
- Integrated with Network Video Recorder, swipe card playback and recording through external device
- Integrated with Visitor Management System
- Integrated with 3rd party elevator distribution system
- Integrated with Milestone VMS application
- Integrated with 3rd party building management system

Lift Control System

- Settings for lift controllers
- High speed data exchange to 3rd elevator server
- Work with ACX 8100 Reader Interface Panel
- Support QR code / Biometric / Contactless Smart Card readers
- Integrated with ACX Visitor Management System

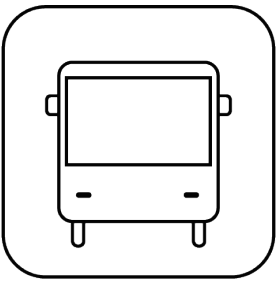

Visitor Management System

- Automated visitor registration system and track visitor record
- A web-based application which can be installed on CLOUD or at local servers
- Possible integration with ACX Access Control Eader & System, as well as Turnstile & Lift Destination Control System for maximal automation
- Applied in both commercial and residential buildings

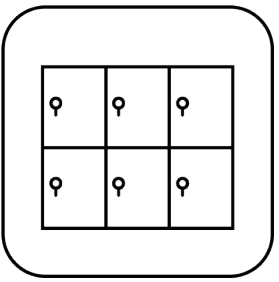

Facility Booking System

- Make room or facility booking on computer via web portal and smart device via app
- Check room status and review all bookings online and outside meeting rooms
- Interactive touch display
- Customization available
- Workplace analytic report

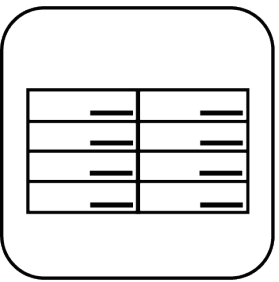

Shuttle Bus System

- Managing shuttle bus drivers and passengers
- Driver clock in via app
- Check passenger's valid access rights to shuttle
- Record tracking

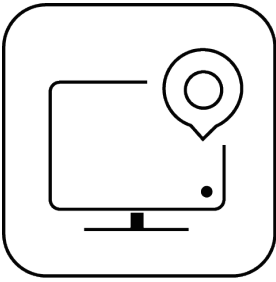

Smart Locker System

- Provide locker rental services
- A locker can be shared with several people
- Locker access reader supports RFID Card, Bluetooth, Scramble QR Code, NFC, Facial Recognition, Palm Vein, Keypad, Octopus

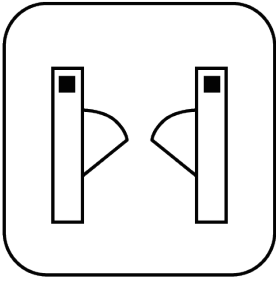

Smart Mailbox System

- Easily checking mailbox status via email, app, and SMS
- Notidy residents in real time when mail arrives
- Unlock digital mailbox lock by smartphone via Bluetooth or Scramble QR Code
- Mailbox access reader supports RFID Card, Bluetooth, Scramble QR Code, NFC, Facial Recognition, Palm Vein, Keypad, Octopus

Electronic Map

- ◆ Real time display of the door and sensor status as well as video monitoring
- ◆ Manual control of E-Lock open & close
- ◆ Group / Individual acknowledgement
- ◆ Video Management System
- ◆ Integrated with Milestone VMS application
- ◆ Integrated with HIKVision, Dahua & NxWitness NVR
- ◆ Video playback for swipe card and alarm records
- ◆ Screen capture or video playback stored in external device

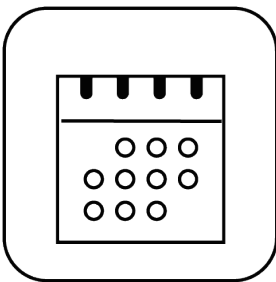

Turnstile System

- ◆ Provide an open platform for the 3rd party integration of lift destination control and ACX Visitor Management System
- ◆ Support human biometric technology including Facial and Palm Vein Recognition, mobile Scramble QR Code, Contactless Smart Card 125KHz 13.56MHz RF , NFC technology , HK Octopus
- ◆ Upon detecting a user's identity, the LCD screen can will instantly display the lift ID and user's access status
- ◆ Capable of embedding a Thermal Sensor in the turnstile to measure body temperature

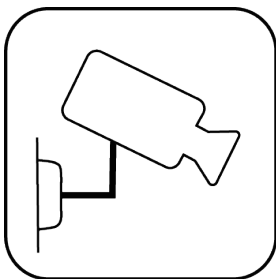

Mobile Patrol System

- ◆ For security guard to maintain daily operation
- ◆ NFC-tagged checkpoints
- ◆ Guards take attendance by Android phones with NFC communication
- ◆ Real-time record uploading and checking
- ◆ Server and data on cloud
- ◆ Comprehensive feedback including records, incidents, SOS, voice, photos, and vide
- ◆ Comprehensive reports including the time a checkpoint is visited, missed checkpoin guards' names, and incidents
- ◆ Random scramble encryption for all data communication

Time and Attendance

- ◆ Staff scheduling and attendance taking
- ◆ User's roster can be set by company, department, division or individual
- ◆ Users define the valid punch record originating from specific door access panel for time and attendance
- ◆ Fast report generation
- ◆ Automatic email attendance reports to authorized recipients

Surveillance System Integration

- ◆ Manage all surveillance video sources in one system
- ◆ Configure cameras (IP address) in the system
